

EXP 2 : Create a simple cloud software application for Flight Reservation System Using Cloud Service Provider to demonstrate SaaS

AIM:

To create a simple cloud software application for Flight Reservation System Using Cloud Service Provider to demonstrate SaaS

PROCEDURE :

1. Go to <https://creator.zoho.com> and sign in.
2. Click **“Create Application”** → Select **“Create from Scratch”**.
3. Enter app name → Click **“Create”**.
4. Click **“Create New Form”** → Drag & drop fields → Click **“Save”**.
5. Zoho auto-generates a default report (data table).
6. Click **“Create Report”** to add custom views (list, calendar, kanban).
7. Go to **“Workflow”** → Add form logic (validation, actions, scripts).
8. Use **Deluge scripting** for advanced automation if needed.
9. Click **“Pages”** → Create dashboards using charts, buttons, etc.
10. Test the app using **“Preview”** or **“Access Application”**.
11. Click **“Share”** to invite users and set permissions.
12. Click **“Publish”** to make the app live.
13. Use **mobile app preview** to test mobile responsiveness.
14. Enable **notifications or email alerts** under workflows.
15. Use **app settings** to manage backups, permissions, and app branding.
